

## **CSS Job Description – EBS Technical Consultant – Solution Architect**

### **CSS Company Background:**

Headquartered in Charleston, South Carolina and serving hundreds of organizations across the nation, CSS is a leader in providing consulting services for the deployment of Oracle Enterprise Solutions for mid-and-large-sized companies. CSS partners with Oracle with specialized practices for all Oracle Enterprise applications: Oracle E-Business Suite, JD Edwards and PeopleSoft Enterprise, across several industry segments.

CSS Guiding Principles, that have also given us 12 consecutive years of growth, are to:

- Bring the best talent on board and leverage those resources
- Keep the company lean, efficient and focused
- Maintain the best client service
- Treat challenges as opportunities for growth and education
- Stay current on technology certifications

### **Description:**

CSS is seeking an experienced Oracle Applications Solution Architect focused in E-Business Suite to join our consulting team and assist in the continuing development of our Oracle Services practice. The qualified candidate will have 10 years of experience delivering custom applications, integrations, conversions, and reporting solutions centered on the Oracle EBS framework. The Solution Architect must have strong supporting experience in core EBS foundational technologies as part of a large scale Oracle E-Business Suite initiative.

### **Responsibilities:**

- Act as a lead consultant in the technical track of CSS's Oracle EBS practice. Provide key technical consulting support in the pre-sales and solution design phases of client engagements.
- Act as a key manager in developing project plans and estimates for level of effort across multiple engagements.
- Lead complex development activities by providing architect level technical services during construction and testing phases of an engagement.
- Maintain knowledge of current technologies deployed by Oracle including development tools, ETL tools, Business Process Engineering Language (BPEL) , and SOA foundation pack through the use of CSS's OPN partner status and membership in the Oracle AIA program.
- Work directly with EBS functional specialists or business users to thoroughly understand functional requirements to produce highly effective technical design documentation using best practice development standards.

- Design, configure and code reports, UI, programs, extensions and interfaces in Oracle as needed to support client business functions.

**Required Knowledge and Experience:**

- Minimum 10 years of experience in an Oracle E-Business environment delivering custom applications, integrations, conversions, and reporting solutions. Familiarity with Oracle R12 EBS application modules, including functionality and/or development.
- Data model understanding of financials modules and experience with configuration and maintenance for core EBS foundational technologies including Application Object Library, Concurrent Manager, creation of custom concurrent programs, API's, etc.
- Strong skills in communication (verbal and written), problem solving and analytical skills. Should be a self-starter and possess the ability to work well in a team atmosphere.
- Ability to formulate requirements, design specifications, and develop solutions utilizing appropriate analytical methodologies, tools and systems.
- Proven expertise including hands on ability to deliver solutions using Java, J2EE, J-Developer Tools, PL/SQL, Oracle Forms, OAF, unix, Workflow, Oracle Reports. XML Publisher, and XSL/XSLT. Experience in Oracle Fusion Middleware, SOA and ESB is highly desirable
- Degree in computer science, MIS, or a related field is required.

**Attractive Total Compensation Package:**

- Salary + Bonus
- Profit Sharing
- 401k including Employer Match
- Full Medical, Dental, and Vision Benefits

**The ideal candidate:**

- 10 years of experience
- Bachelor's Degree
- Willingness to Travel: Frequent (80%) Monday through Thursday

**Considerations:**

- No relocation required – this is a national position.
- Job will entail 80% travel.
- Candidates must provide legal work authorization (US Citizen, Green Card, and EAD)
