

**EMPLOYER:** CSS International, Inc.

**POSITION OFFERED:** Business Analyst

**LOCATION:** Charleston, SC

**JOB DESCRIPTION:** Analyze business systems, modify and design custom software solutions based on Oracle/JD Edwards software for large scale mission critical systems employing large interactive databases. Implement Inventory, Sales, Distribution and warehouse management functions of JD Edwards Enterprise One. Provide technical leadership and system administration. Assist in business planning and project management. Create and implement software enhancements using software development tools such as Visual Studio.net, Sun One Studio, C++, Visual C++, Visual Basic, JAVA, XML, SQL, UML, and HTML, Oracle and MS SQL Server databases, networking technologies such as TCP/IP, and Java technologies (J2EE architecture, JavaScript, JSP, JDBC, EJB, JavaBeans, and Servlet). Primary job site is at company headquarters in Charleston, SC, but travel is required for short- and long-term assignments at client sites throughout the U.S.

**JOB REQUIREMENTS:** 5 years of experience developing or implementing ERP (Enterprise Resource Planning) applications (such as Oracle E-Business Suite, JD Edwards, or PeopleSoft). Legal right to work in the U.S.
